ALDOLASE

Profile Details | 1 Parameters

Fasting: Fasting not required | Report Time: Within 3 days

Specimen Required: Blood

Price- ~~₹1999~~ **₹999**

Parameters Included

About This Test

Aldolase is an enzyme crucial for carbohydrate metabolism, specifically involved in the breakdown of glucose for energy production. It catalyzes the reversible conversion of fructose-1,6-bisphosphate to glyceraldehyde-3-phosphate and dihydroxyacetone phosphate during glycolysis, a fundamental process in cellular energy generation. Aldolase exists in three isoforms: aldolase A in muscle tissue, aldolase B in liver and kidney tissue, and aldolase C in brain and nervous tissue. Elevated levels of aldolase i the blood can indicate tissue damage or disease, particularly in conditions affecting muscle or liver function. Aldolase testing is used in clinical settings to diagnose and monitor various metabolic disorders and muscle diseases.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable
