About This Test

Alkaline Phosphatase (ALP): ALP is an enzyme found in various tissues, especially the liver, bones, and bile ducts. Elevated ALP levels can indicate liver disease, bone disorders, or bile duct obstruction. Low levels might suggest malnutrition or certain genetic conditions. **Protein:** Total protein test measures the amount of protein in th blood, including albumin and globulin. It helps assess nutritional status, liver and kidney function, and various medical conditions. Abnormal protein levels can indicate liv disease, kidney disease, or inflammatory conditions. These tests are crucial for diagnosing and monitoring various health conditions.

98% On-Time Reports	100% Sample Accuracy	Free Home Collection	Expert Doctors	750+ Lab Tests
