MINI LFT

Profile Details | 4 Parameters

Fasting: fasting is not mandatory | Report Time: Same Day

Specimen Required: Blood

Price- ~~₹550~~ **₹250**

Parameters Included

- SGOT
- SGPT
- Total Protein
- Serum Albumin

About This Test

SGOT (Serum Glutamic-Oxaloacetic Transaminase) and SGPT (Serum Glutamic-Pyruvic Transaminase), also known as AST (Aspartate Aminotransferase) and ALT (Alanine Aminotransferase), are liver enzymes measured in blood tests to assess liver function and detect liver damage. Elevated levels may indicate liver conditions like hepatitis, fatty liver, or alcohol-related liver disease, but they can also rise due to muscle damage or heart conditions. Albumin, a protein synthesized in the liver, is measured to evaluate liver function and nutritional status. Low albumin levels may suggest chronic liver disease, kidney disorders, or malnutrition. These markers provide insight into liver health and overall metabolic function. SGOT and SGPT indicate potential liver cell injury, while albumin reflects the liver's ability to produce proteins essential for maintaining blood volume and transporting substances in the body. Together, they form a crucial part of liver function tests.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable

**Fasting 10–12 hrs essential | *Limited Period Offer | *Reports within Same Day*
