- TSH
- RBS

About This Test

A **pregnancy profile** measures various health indicators of both the mother and fetus to monitor pregnancy progress. It includes the mother's medical history, weight, and vital signs, as well as blood tests for glucose levels, infections, and anemia. Fetal development is assessed through ultrasounds, while genetic screening tests, such as the triple marker test, help evaluate the risk of birth defects. The profile also tracks lifestyle factors like diet, exercise, and stress levels, ensuring comprehensive prenatal care.
