THYRPOID PROFILE PRO

Profile Details | 6 Parameters

Fasting: overnight Fasting 9-12 hours | Report Time: Same Day

Specimen Required: Blood

Price- ~~₹3500~~ **₹1499**

Parameters Included

- TSH
- T4
- FT4
- T3
- FT3
- Anti TPO

About This Test

A thyroid profile is a comprehensive set of tests used to evaluate thyroid function and diagnose disorders. It typically includes: FT3 (Free Triiodothyronine): Measures the active form of T3 hormone in the blood, which helps regulate metabolism, heart rate, and body temperature. FT4 (Free Thyroxine): Assesses the unbound form of T4 hormone, crucial for energy production and overall metabolism. T3 (Total Triiodothyronine): Evaluates the total amount of T3 in the blood, both bound and unbound, providing insights into thyroid activity. T4 (Total Thyroxine): Measures the total T4 hormone, which is a precursor to T3 and affects metabolic processes. TSH (Thyroid-Stimulating Hormone): Indicates how well the pituitary gland is signaling the thyroid to produce T3 and T4, reflecting thyroid health. Anti-TPO (Antithyroid Peroxidase Antibodies): Detects antibodies against thyroid peroxidase, an enzyme involved in thyroid hormone production, helping identify autoimmune thyroid disorders. These parameters collectively provide a detailed view of thyroid function and help diagnose conditions like hypothyroidism, hyperthyroidism, and autoimmune thyroid diseases.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable

**Fasting 10–12 hrs essential | *Limited Period Offer | *Reports within Same Day*
