About This Test

A **fever package** including CBC, ESR, MP, Widal (Typhi Dot), and urine tests provides a comprehensive assessment to identify the cause of fever: - **CBC (Complete Blood Count):** Assesses overall health, detects infections, anemia, and other blood disorders. - **ESR (Erythrocyte Sedimentation Rate):** Measures inflammation levels, helping to identify inflammatory or infectious conditions. - **MP (Malaria Parasite):** Detects the presence of malaria parasites in the blood, indicating malaria infection. - **Widal Test (Typhi Dot):** Identifies typhoid fever by detecting antibodies against Salmonella typhi and Salmonella paratyphi. - **Urine Analysis:** Evaluates for urinary tract infections and other abnormalities. This package aids in diagnosing various infectious or inflammatory conditions responsible for fever, guiding appropriate treatment.
