

# FRUCTOSAMINE

Profile Details | 1 Parameters

Fasting: Fasting not required | Report Time: Within 4 days

**Specimen Required:** Blood

Price- ₹899 **₹499**

## Parameters Included

### About This Test

The fructosamine test is a blood test used to measure average blood glucose levels over the past 2-3 weeks. It assesses the level of glycated serum proteins, primarily albumin, which reflects recent glucose concentrations in the bloodstream. This test is particularly useful when monitoring short-term changes in blood sugar control, especially in individuals with diabetes. Unlike the HbA1c test, which provides a longer-term view, fructosamine offers insights into more recent glucose fluctuations. It helps healthcare providers adjust treatment plans promptly to maintain optimal diabetes management.
