

# POTASSIUM-K

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Same day

**Specimen Required:** Blood

Price- ₹250 **₹199**

## Parameters Included

### About This Test

A potassium test measures the level of potassium in the blood. Potassium is a crucial electrolyte that helps regulate heart function, muscle contractions, and nerve signals. It plays a key role in maintaining fluid balance and acid-base equilibrium in the body. Potassium levels are primarily controlled by the kidneys, which excrete excess potassium through urine. Abnormal potassium levels can lead to various health issues: hypokalemia (low potassium) may cause symptoms like muscle weakness, fatigue, and arrhythmias, while hyperkalemia (high potassium) can lead to serious conditions such as cardiac arrhythmias or kidney dysfunction. Monitoring potassium levels is essential for diagnosing and managing conditions related to electrolyte imbalances, kidney function, and overall cardiovascular health.

**98% On-Time Reports**  
Available 24x7

**100% Sample Accuracy**  
NABL Certified Labs

**Free Home Collection**  
Door-to-Door Pickup

**Expert Doctors**  
Across India

**750+ Lab Tests**  
Trusted & Reliable

*\*Fasting 10-12 hrs essential | \*Limited Period Offer | \*Reports within Same day*
