

THYROID PROFILE PRO MAX

Profile Details | 7 Parameters

Fasting: Fasting is not mandatory | Report Time: Same Day

Specimen Required: Blood

Price- ₹4200 **₹1945**

Parameters Included

- TSH
- T3
- T4
- FT3
- FT4
- Anti TPO
- Anti TG

About This Test

Thyroid profile pro is a comprehensive set of tests used to assess thyroid function and diagnose disorders. It includes: FT3 (Free Triiodothyronine): Measures the unbound, active form of T3 hormone, which regulates metabolism and energy. FT4 (Free Thyroxine): Evaluates the unbound form of T4 hormone, crucial for energy production and metabolic functions. T3 (Total Triiodothyronine): Assesses both bound and free T3 levels, providing insight into thyroid activity. T4 (Total Thyroxine): Measures total T4 levels, important for overall metabolic processes. TSH (Thyroid-Stimulating Hormone): Indicates how well the pituitary gland is signaling the thyroid to produce T3 and T4, reflecting thyroid function. Anti-TPO (Antithyroid Peroxidase Antibodies): Detects antibodies against TPO, an enzyme in thyroid hormone production, indicating autoimmune thyroid conditions. Anti-TG (Antithyroglobulin Antibodies): Measures antibodies against thyroglobulin, a protein involved in thyroid hormone production, helping diagnose autoimmune thyroid diseases. Together, these tests provide a detailed view of thyroid health and aid in diagnosing conditions such as hypothyroidism, hyperthyroidism, and autoimmune thyroid disorders.
