

# TPHA WITH TITER - TREPONEMA PALLIDUM HEMAGGLUTINATION

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Next day

**Specimen Required:** Blood

Price- ₹990 **₹690**

## Parameters Included

### About This Test

A TPHA (Treponema pallidum hemagglutination assay) with titer measures the concentration of antibodies against Treponema pallidum, the bacterium that causes syphilis. The test detects and quantifies the presence of these antibodies in the blood, indicating a past or current syphilis infection. The titer represents the dilution at which antibodies are still detectable, helping assess the severity and progression of the infection. High titers can suggest active infection or a recent infection, while declining titers may indicate successful treatment.
