

BETA 2 GLYCOPROTEIN PANEL

Profile Details | 3 Parameters

Fasting: Fasting is not mandatory | Report Time: Next day

Specimen Required: Blood

Price- ₹4497 **₹2997**

Parameters Included

- Beta 2 Glycoprotein IgA
- Beta 2 Glycoprotein IgG
- Beta 2 glycoprotein IgM

About This Test

A beta-2 glycoprotein I (β 2GPI) test measures the levels of antibodies (IgA, IgG, and IgM) against beta-2 glycoprotein I in the blood. These antibodies are associated with antiphospholipid syndrome (APS), an autoimmune disorder that increases the risk of blood clots. - **IgA**: Often associated with mucosal immunity, its presence can indicate certain autoimmune responses. - **IgG**: The most common antibody, often indicating long-term immunity or chronic conditions. - **IgM**: Indicates a primary or early immune response. Elevated levels of these antibodies may suggest APS or related autoimmune disorders, which can lead to complications such as deep vein thrombosis, stroke, or recurrent miscarriages.
