## C1 INHIBITOR (C1-INH) DEFICIENCY

Profile Details | 1 Parameters

Fasting: Overnight fasting for 9-12 hours | Report Time: Same Day

Specimen Required: Blood

## Price- ₹2800 **₹2199**

## **Parameters Included**

## **About This Test**

The C1 inhibitor test measures the level and function of the C1 inhibitor protein in the blood. This protein regulates the complement and contact activation systems of the immune response, preventing excessive inflammation and tissue damage. Low levels or dysfunction of C1 inhibitor can lead to conditions such as hereditary angioedema or acquired angioedema. The test is crucial for diagnosing these conditions, evaluating the severity of the disease, and monitoring the effectiveness of treatment.
