About This Test

A **fever package** including CBC, urine analysis, ESR, malaria antigen, and Typhi Dot test measures the following: - **CBC (Complete Blood Count):** Evaluates overall health and identifies infections, anemia, and blood disorders. - **Urine Analysis:** Detects urinary tract infections, kidney issues, and other abnormalities. - **ESR (Erythrocyte Sedimentation Rate):** Indicates inflammation levels in the body, which can be due to infections or chronic diseases. - **Malaria Antigen Test:** Detects specific antigens produced by malaria parasites in the blood, confirming malaria infection. - **Typhi Dot Test:** Identifies typhoid fever by detecting antibodies against Salmonella typhi and Salmonella paratyphi. This package helps in diagnosing and managing various infectious and inflammatory conditions that cause fever.
