HUMAN GROWTH HARMONE -HGH

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Next Day

Specimen Required: Blood

Price- ₹1290 **₹660**

Parameters Included

About This Test

A human growth hormone (HGH) test measures the concentration of growth hormone in the blood. Produced by the pituitary gland, HGH is vital for growth, cell repair, an metabolism. Elevated levels can indicate conditions like acromegaly or gigantism, while low levels may point to growth hormone deficiency. This test helps diagnose and manage growth disorders and monitor the effectiveness of related treatments.
