Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 7 Days

Specimen Required: Blood

## Price- ₹2800 **₹1549**

## **Parameters Included**

## **About This Test**

The Leishmania IgG antibodies test measures the concentration of IgG antibodies against the \*Leishmania\* parasite in the blood. These antibodies are produced by the immune system in response to infection with \*Leishmania\*, which causes leishmaniasis. Elevated levels of IgG antibodies indicate exposure to or an active infection with \*Leishmania\*. This test is used to diagnose leishmaniasis, differentiate it from other diseases, and monitor treatment response. It is particularly useful in regions where leishmaniasis is endemic.
