- Insulin -Fasting
- FBS- Fasting blood Sugar
- AMH-Anti Mullerian Hormone
- LH- Luteinizing Hormone
- FSH- Follicle Stimulating Hormone
- PRL -Serum Prolactin
- Testosterone Total
- DHEAS - Dehydroepiandrosterone Sulphate

About This Test

The PCOD hormonal panel package includes key tests to evaluate hormonal balance and metabolic status. It covers LH (Luteinizing Hormone) and FSH (Follicle Stimulating Hormone) to assess ovarian function and their ratio, along with PRL (Prolactin) and AMH (Anti-Müllerian Hormone) for reproductive health. E2 (Estradiol) and TSH (Thyroid Stimulating Hormone) help check estrogen levels and thyroid function. Total Testosterone and DHEA-S are included to detect androgen excess. The package also contains CBC (Complete Blood Count) for general health screening, FBS (Fasting Blood Sugar) and Fasting Insulin to evaluate glucose metabolism and insulin resistance. This comprehensive panel is useful for diagnosing and monitoring PCOD and related hormonal imbalances.
