## **SERUM FERRITIN**

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Same Day

Specimen Required: Blood

Price- ₹599 ₹330

## **Parameters Included**

## **About This Test**

Ferritin measures the amount of ferritin protein in the blood, which reflects the body's iron stores. Ferritin is an iron-binding protein found in cells, particularly in the liver, spleen, and bone marrow. High ferritin levels may indicate excess iron or inflammation, while low levels can suggest iron deficiency or anemia. This test helps assess overall iron levels in the body, diagnose conditions like iron deficiency anemia, and monitor iron therapy effectiveness.
