SERUM IMMUNOFIXATION ELECTROPHORESIS -IFE

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Same Day

Specimen Required: Blood

Price- ₹8200 **₹5800**

Parameters Included

About This Test

The serum immunofixation electrophoresis (IFE) test measures and analyzes specific proteins in the blood, primarily focusing on abnormal or monoclonal proteins produce by plasma cells. It helps identify and characterize different types of immunoglobulins and their subtypes, such as IgG, IgA, IgM, and light chains. This test is crucial for diagnosing and monitoring conditions like multiple myeloma, Waldenström's macroglobulinemia, and other monoclonal gammopathies, providing insights into the present of abnormal protein spikes or bands.
