SPUTUM AFB

Profile Details | 1 Parameters

Fasting: N/A | Report Time: Fasting is not Mandatory

Specimen Required: Sputum

Price- ₹495 ₹270

Parameters Included

About This Test

A sputum AFB (Acid-Fast Bacillus) test measures the presence of acid-fast bacteria, primarily Mycobacterium tuberculosis, in the sputum. This test is crucial for diagnosing tuberculosis (TB) and monitoring the effectiveness of TB treatment. Sputum samples are stained and examined under a microscope for AFB. Positive results indicate TB infection or other mycobacterial infections, necessitating further medical evaluation and treatment to prevent spread and ensure proper patient care.
