TACROLIMUS LEVELS

Profile Details | 1 Parameters

Fasting: Overnight Fasting for 9-12 hours | Report Time: Within 3 Days

Specimen Required: Blood

Price- ₹5000 **₹2795**

Parameters Included

About This Test

Tacrolimus levels are measured in the blood to monitor and adjust the dosage of tacrolimus, an immunosuppressive drug used primarily to prevent organ transplant rejection. Accurate measurement ensures the drug is within the therapeutic range, avoiding under-dosing (which can lead to rejection) and overdosing (which can cause toxicity). Regular monitoring helps manage side effects and optimize treatment efficacy, ensuring the drug's concentration is safe and effective for the patient.
