

URINE R/M, URINE ANALYSIS

Profile Details | 1 Parameters

Fasting: Overnight fasting for 9-12 hours | Report Time: Same day

Specimen Required: Urine

Price- ₹199 **₹99**

Parameters Included

- Urine R/M or Urine Analysis

About This Test

A Urine R/M (Routine and Microscopic) test measures various components and properties of urine to assess overall health and detect potential disorders. The routine part involves analyzing the physical and chemical characteristics, such as color, clarity, pH, specific gravity, and the presence of substances like protein, glucose, ketones, and bilirubin. The microscopic part examines urine sediment for cells, crystals, bacteria, and casts. This test helps diagnose conditions like urinary tract infections, kidney disease, diabetes, and liver problems, providing a comprehensive overview of a patient's urinary and metabolic health.
