VDRL TITER- RPR FOR SYPHILIS -QUANTITATIVE

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Same Day

Specimen Required: Blood

Price- ₹650 ₹295

Parameters Included

About This Test

The VDRL (Venereal Disease Research Laboratory) titer measures the concentration of antibodies in the blood that are produced in response to syphilis, a sexually transmitted infection caused by the bacterium *Treponema pallidum*. This non-treponemal test detects the presence of reagin antibodies, which are not specific to syphi but can indicate its presence. A VDRL titer helps determine the level of these antibodies, aiding in diagnosing syphilis and monitoring the effectiveness of treatment.
