

A4- ANDROSTENEDIONE

Profile Details | 1 Parameters

Fasting: Overnight Fasting for 9-12 hours | Report Time: Within 3 days

Specimen Required: Blood

Price- ₹2590 **₹1450**

Parameters Included

About This Test

An androstenedione test measures the level of androstenedione, a steroid hormone produced by the adrenal glands, ovaries, and testes. It is a precursor to testosterone and estrogen. This test is used to evaluate the function of these glands and can help diagnose conditions such as polycystic ovary syndrome (PCOS), adrenal hyperplasia, and androgen-secreting tumors. Elevated or decreased levels of androstenedione can indicate hormonal imbalances and guide the diagnosis and management of disorders related to abnormal androgen production.
