

# ACETYL CHOLINE RECEPTOR ANTIBODY- ACHR AB

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 6 Days

**Specimen Required:** Blood

**Price- ₹3900 ₹2099**

## Parameters Included

### About This Test

The acetylcholine receptor antibody test measures the presence of antibodies against acetylcholine receptors at the neuromuscular junction. These antibodies interfere with the normal transmission of nerve impulses to muscles. Elevated levels are commonly associated with myasthenia gravis, an autoimmune disorder characterized by muscle weakness and fatigue. The test helps in diagnosing this condition, assessing its severity, and guiding treatment strategies. It is crucial for confirming the diagnosis and managing autoimmune neuromuscular disorders effectively.

**98% On-Time Reports**  
Available 24x7

**95% Sample Accuracy**  
NABL Certified Labs

**Free Home Collection**  
Door-to-Door Pickup

**Expert Doctors**  
Across India

**750+ Lab Tests**  
Trusted & Reliable
