About This Test

An ACE (Angiotensin-Converting Enzyme) test measures the level of ACE in the blood. ACE is an enzyme that plays a crucial role in regulating blood pressure by converting angiotensin I to angiotensin II, a potent vasoconstrictor. Elevated ACE levels can indicate sarcoidosis, an inflammatory disease that affects multiple organs, especially the lungs and lymph nodes. The ACE test helps in diagnosing and monitoring sarcoidosis and can also assist in evaluating other conditions affecting ACE production.
