

# ADENOSINE DEAMINASE SERUM - ADA

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Next Day

**Specimen Required:** Blood

Price- ₹950 ₹495

## Parameters Included

### About This Test

Adenosine deaminase (ADA) measures the activity of the enzyme adenosine deaminase in the blood or tissues. ADA plays a crucial role in purine metabolism by converting adenosine into inosine. Elevated levels of ADA can indicate various conditions, such as tuberculosis, certain cancers, and autoimmune disorders like rheumatoid arthritis. It is particularly useful in diagnosing and monitoring tuberculosis, especially when testing fluid samples from areas like the pleural cavity. Low levels may be seen in conditions such as severe combined immunodeficiency (SCID).

**98% On-Time Reports**  
Available 24x7

**95% Sample Accuracy**  
NABL Certified Labs

**Free Home Collection**  
Door-to-Door Pickup

**Expert Doctors**  
Across India

**750+ Lab Tests**  
Trusted & Reliable

\*Fasting 10-12 hrs essential | \*Limited Period Offer | \*Reports within Next Day
