Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 4 Days

**Specimen Required:** Blood

**Price- ₹3300 ₹2400**

## Parameters Included

### About This Test

Allergy drug tests measure the levels of medications taken to treat allergic reactions or conditions. These tests can detect the presence of specific drugs in the blood, urine, or other biological samples. They are used to ensure proper adherence to prescribed treatments, evaluate drug efficacy, and monitor for potential drug interactions or side effects. This helps healthcare providers adjust treatment plans, manage allergies effectively, and ensure optimal therapeutic outcomes for patients.
