Profile Details | 1 Parameters

Fasting: Overnight fasting for 9-12 hours | Report Time: Within 4 Days

Specimen Required: Blood

Price- ₹3250 **₹2480**

Parameters Included

About This Test

****AMA (Anti-Mitochondrial Antibodies)**** are measured to detect autoimmune liver diseases, particularly primary biliary cholangitis (PBC). The presence of these antibodies indicates an immune response targeting mitochondria within liver cells. Elevated AMA levels are a key marker for diagnosing PBC, helping to differentiate it from other liver conditions. By measuring AMA, healthcare providers can confirm the diagnosis, monitor disease progression, and guide treatment decisions to manage liver inflammation and prevent further damage.
