

# ANTI MOG ( MYELIN OLIGODENDROCYTE GLYCOPROTEIN )

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 5 Days

**Specimen Required:** Blood

**Price-** ₹8400 **₹6499**

## Parameters Included

### About This Test

The anti-MOG (anti-myelin oligodendrocyte glycoprotein) antibody test measures the presence of antibodies against myelin oligodendrocyte glycoprotein, a protein found on the surface of myelin in the central nervous system. These antibodies are associated with a range of demyelinating disorders, including autoimmune encephalitis and multiple sclerosis variants. Elevated anti-MOG antibody levels can help in diagnosing these conditions and distinguishing them from other neuroinflammatory diseases. The test is used to guide diagnosis, treatment, and management of patients with neurological symptoms.
