ANTI PHOSPHOLIPID ANTIBODY PROFILE(A L P A)

Profile Details | 5 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 3 Days

Specimen Required: Blood

Price- ~~₹7999~~ **₹3499**

Parameters Included

- Cardiolipin Antibodies IgG
- Phospholipid IgG Antibodies
- Phospholipid IgM Antibodies
- Lupus Anticoagulant By DRVVT
- Cardiolipin Antibodies IgM

About This Test

Antiphospholipid Antibody Panel includes tests such as Cardiolipin Antibodies (IgG & IgM), Phospholipid Antibodies (IgG & IgM), and Lupus Anticoagulant (DRVVT). These tests detect autoantibodies that mistakenly target phospholipids in cell membranes. They are primarily associated with Antiphospholipid Syndrome (APS), an autoimmune disorder that increases the risk of abnormal blood clot formation. These antibodies can lead to venous or arterial thrombosis, recurrent miscarriages, and other pregnancy complications. Among them, IgG antibodies are considered more clinically significant, while IgM antibodies may sometimes be temporary or less specific. Lupus anticoagulant testing helps identify clotting abnormalities despite prolonged clotting time in lab tests. The panel is performed using blood samples (serum or citrated plasma), and fasting is not required. If any result is positive, repeat testing after at least 12 weeks is recommended to confirm persistence and guide proper diagnosis and treatment.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable

**Fasting 10–12 hrs essential | *Limited Period Offer | *Reports within Within 3 Days*
