About This Test

An Apolipoprotein A1 (Apo A1) test measures the level of Apo A1 protein in the blood. Apo A1 is the main protein component of high-density lipoprotein (HDL), known as "good cholesterol." It helps transport cholesterol from the arteries to the liver for removal. This test assesses cardiovascular disease risk, with low Apo A1 levels indicating higher risk and higher levels being protective. It's used alongside other lipid tests to evaluate heart health.
