BENCE JONES PROTEIN URINE QUALITATIVE

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 2 Days

Specimen Required: Urine

Price- ~~₹950~~ **₹549**

Parameters Included

About This Test

A Bence Jones protein test measures the presence of abnormal proteins, known as Bence Jones proteins, in the urine. These proteins are produced by abnormal plasma cells and are associated with multiple myeloma, a type of blood cancer. Elevated levels of Bence Jones proteins indicate the presence of this cancer and help in diagnosing and monitoring the disease. This test is important for assessing disease progression and evaluating the effectiveness of treatment in individuals with multiple myeloma.
