BETA 2 GLYCOPROTEIN IGA

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 2 Days

Specimen Required: Blood

Price- ~~₹1800~~ **₹980**

Parameters Included

About This Test

Beta-2 glycoprotein I (beta-2 GP1) IgA antibodies are a type of immunoglobulin A (IgA) antibodies directed against beta-2 glycoprotein I, a protein involved in the regulation of blood coagulation. These antibodies are associated with autoimmune conditions, particularly antiphospholipid syndrome (APS). **Key points include:** - **Diagnostic Use:** The presence of beta-2 GP1 IgA antibodies is used to help diagnose APS, a disorder characterized by blood clots, pregnancy complications, and other related issues. - **Clinical Relevance:** Measuring beta-2 GP1 IgA antibodies, along with other antiphospholipid antibodies (such as beta-2 GP1 IgG and IgM), helps in assessing the risk of thrombosis and guiding treatment decisions. - **Autoimmune Indicator:** Elevated levels of these antibodies indicate an autoimmune response wher the immune system mistakenly targets beta-2 glycoprotein I, leading to increased blood clotting tendencies. Testing for beta-2 GP1 IgA is particularly important in patient who exhibit symptoms of APS or have unexplained blood clotting or pregnancy complications.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable
