BLOOD CULTURE AND SENSITIVITY

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 7 Days

Specimen Required: Blood

Price- ~~₹1400~~ **₹690**

Parameters Included

About This Test

A blood culture and sensitivity test measures the presence of bacteria or fungi in the bloodstream and determines their susceptibility to antibiotics. This test involves taking a blood sample, which is then incubated to allow any microorganisms present to grow. If growth occurs, the specific type of bacteria or fungi is identified, and furth testing is done to find out which antibiotics are most effective against them. This test is crucial for diagnosing bloodstream infections and guiding appropriate antibiotic treatment.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable
