CERULOPLASMIN

Profile Details | 1 Parameters

Fasting: Overnight Fasting for 9-12 hours | Report Time: Next Day

Specimen Required: Blood

Price- ₹1599 ₹830

Parameters Included

About This Test

A ceruloplasmin test measures the level of ceruloplasmin, a protein that binds and transports copper in the blood. Ceruloplasmin is produced by the liver and is essential for iron metabolism and antioxidant activity. Measuring ceruloplasmin levels helps diagnose and monitor conditions related to copper metabolism, such as Wilson's disease, where copper accumulates in tissues due to a deficiency of ceruloplasmin. Abnormal levels can also indicate liver disease, malnutrition, or other disorders affecting copper and iron metabolism.
