

ELECTROLYTES PANEL- NA K CL

Profile Details | 3 Parameters

Fasting: Fasting is not mandatory | Report Time: Same Day

Specimen Required: Blood

Price- ₹499 **₹330**

Parameters Included

- Sodium -NA
- Potassium-K
- Chloride- Cl

About This Test

An electrolyte panel measures the levels of key electrolytes in the blood, including sodium, potassium, chloride, and bicarbonate. These electrolytes are crucial for maintaining fluid balance, nerve function, and muscle contractions. The panel helps assess overall health, diagnose conditions related to imbalances, such as dehydration, kidney disease, or acid-base disorders, and monitor the effects of treatments. Abnormal results can indicate issues with fluid and electrolyte balance, requiring further evaluation and management.
