

ENA/ANA QUANTITATIVE PROFILE-EXTRACTABLE NUCLEAR ANTIGENS / ANTI NUCLEAR ANTIBODIES QUANTITATIVE PROFILE

Profile Details | 1 Parameters
Fasting: Fasting is not mandatory | Report Time: Within 3 Days

Specimen Required: Blood

Price- ₹10000 ₹4990

Parameters Included

About This Test

ENA (Extractable Nuclear Antigens) and ANA (Antinuclear Antibodies) are tests used to detect autoantibodies in the blood. ANA tests screen for antibodies against nuclear components, often indicating autoimmune disorders like lupus. ENA tests identify specific autoantibodies related to conditions such as Sjögren's syndrome, scleroderma, and polymyositis. High levels of these antibodies suggest an autoimmune response, helping diagnose and differentiate various autoimmune diseases.
