

FBS- FASTING BLOOD SUGAR

Profile Details | 1 Parameters

Fasting: Overnight fasting in 9-12 hours | Report Time: Same day

Specimen Required: Blood

Price- ₹199 **₹99**

Parameters Included

About This Test

Fasting Blood Sugar (FBS), also known as fasting plasma glucose (FPG), measures the concentration of glucose in the bloodstream after an overnight fast of at least 8 hours. This test is crucial for diagnosing diabetes and monitoring blood sugar levels in individuals with diabetes. Normal FBS levels typically range from 70 to 100 milligrams per deciliter (mg/dL). Elevated FBS levels may indicate impaired fasting glucose (pre-diabetes) or diabetes mellitus. FBS is a routine screening tool used to assess glucose metabolism and guide treatment decisions to maintain optimal blood sugar control.
