# FREE ANDROGEN INDEX- FAI

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 6 Days

**Specimen Required:** Blood

**Price-** ~~₹5000~~ **₹2495**

## Parameters Included

## About This Test

The Free Androgen Index (FAI) measures the ratio of free testosterone to total testosterone, adjusted for the levels of sex hormone-binding globulin (SHBG) in the blood. It provides an estimate of the biologically active testosterone available in the body. FAI is useful in diagnosing and managing conditions related to hormonal imbalances, such as polycystic ovary syndrome (PCOS) in women and androgen deficiency or excess in men. A high FAI may indicate hyperandrogenism, while a low FAI suggests hypoandrogenism.
