About This Test

The fructosamine test is a blood test used to measure average blood glucose levels over the past 2-3 weeks. It assesses the level of glycated serum proteins, primarily albumin, which reflects recent glucose concentrations in the bloodstream. This test is particularly useful when monitoring short-term changes in blood sugar control, especially in individuals with diabetes. Unlike the HbA1c test, which provides a longer-term view, fructosamine offers insights into more recent glucose fluctuations. It help healthcare providers adjust treatment plans promptly to maintain optimal diabetes management.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable
