

# GTT- GLUCOSE TOLERANCE TEST 2 SAMPLES FASTING AND 2 HOURS

Profile Details | 1 Parameters

Fasting: Overnight fasting for 9-12 hours | Report Time: Same day

**Specimen Required:** Blood

Price- ₹1000 **₹499**

## Parameters Included

### About This Test

The Glucose Tolerance Test (GTT) measures the body's ability to process glucose. It involves two key steps: **Fasting:** The patient fasts for 8-12 hours before the test. A blood sample is taken to measure the fasting glucose level. **2 Hours Post-Glucose:** After the initial blood draw, the patient drinks a glucose solution (typically 75 grams). Another blood sample is taken two hours later to measure how well the body processes the glucose. This test helps diagnose diabetes and other glucose metabolism disorders by comparing fasting and post-glucose blood sugar levels.
