HBA1C

Profile Details | 1 Parameters

Fasting: Fasting not required | Report Time: Same day

Specimen Required: Blood

Price- ~~₹599~~ **₹399**

Parameters Included

About This Test

HbA1c, or glycated hemoglobin, is a blood test that measures average blood sugar levels over the past 2-3 months. It reflects the amount of glucose that has attached to hemoglobin molecules in red blood cells. Higher HbA1c levels indicate poorer blood sugar control and are used primarily to monitor long-term glucose management in individuals with diabetes. This test is essential for assessing the effectiveness of diabetes treatment plans, guiding adjustments in medications, diet, and lifestyle. Maintaining optimal HbA1c levels reduces the risk of diabetes-related complications such as heart disease, stroke, kidney damage, and nerve problems.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable
