HE4- HUMAN EPIDIDYMIS PROTEIN 4

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 5 Days

Specimen Required: Blood

Price- ~~₹2900~~ **₹1995**

Parameters Included

About This Test

The HE4 (Human Epididymis Protein 4) test measures the level of the HE4 protein in the blood. HE4 is a biomarker used primarily to aid in the detection and monitoring of ovarian cancer. Elevated HE4 levels can indicate the presence of ovarian cancer, particularly in postmenopausal women, and help differentiate between benign and malignant pelvic masses. The test is also used to monitor treatment response and detect recurrence of the disease, providing valuable information for managing ovarian cancer.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable
