# HPLC HBA2- BETA THALASSEMIA SCREENING-HB ELECTROPHORESIS

Profile Details | 1 Parameters

Fasting: Fasting is not Manda | Report Time: Within 2 days

**Specimen Required:** Blood

**Price-** ~~₹1299~~ **₹699**

## Parameters Included

## About This Test

Hb electrophoresis-HPLC measures the different types of hemoglobin in the blood. Hemoglobin electrophoresis separates hemoglobin variants based on their electrical charge, while HPLC (High-Performance Liquid Chromatography) separates them based on their interaction with the column material. This combined test helps diagnose hemoglobin disorders such as sickle cell anemia, thalassemia, and other hemoglobinopathies by identifying abnormal hemoglobin variants. It provides a detailed profile of hemoglobin types and their relative amounts, aiding in the accurate diagnosis and management of these conditions.
