

# IMMUNOGLOBULIN-IGG

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Next Day

**Specimen Required:** Blood

Price- ₹800 **₹480**

## Parameters Included

### About This Test

Immunoglobulin IgG measures the level of IgG antibodies in the blood. IgG is the most abundant type of antibody and plays a crucial role in the immune response by identifying and neutralizing pathogens like bacteria and viruses. Elevated IgG levels can indicate a past or chronic infection, while low levels may suggest an immune deficiency or inadequate immune response. The IgG test is often used to diagnose infections, monitor immune system health, and evaluate vaccine responses.
