

# LEISHMANIA ( KALA AZAR ) ANTIBODY IGG

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 7 Days

**Specimen Required:** Blood

Price- ₹2800 **₹1549**

## Parameters Included

### About This Test

The Leishmania IgG antibodies test measures the concentration of IgG antibodies against the \*Leishmania\* parasite in the blood. These antibodies are produced by the immune system in response to infection with \*Leishmania\*, which causes leishmaniasis. Elevated levels of IgG antibodies indicate exposure to or an active infection with \*Leishmania\*. This test is used to diagnose leishmaniasis, differentiate it from other diseases, and monitor treatment response. It is particularly useful in regions where leishmaniasis is endemic.

**98% On-Time Reports**  
Available 24x7
