

# MAGNESIUM

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Next day

**Specimen Required:** Blood

Price- ₹880 ₹390

## Parameters Included

### About This Test

The magnesium test measures the concentration of magnesium in the blood. Magnesium is an essential mineral involved in various bodily functions, including nerve and muscle function, blood sugar control, and bone health. It plays a crucial role in enzyme reactions and energy production. Abnormal levels of magnesium can indicate conditions such as kidney disease, diabetes, or gastrointestinal disorders. Low magnesium levels may cause muscle cramps, weakness, or irregular heartbeats, while high levels can lead to symptoms like nausea, confusion, and cardiac issues.
