NEISSERIA GONORRHEA QUALITATIVE PCR

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: 5 days, processing on wednesday, saturday,

Specimen Required: Urine, Nasal Swab, Throat Swab

Price- ~~₹5000~~ **₹2999**

Parameters Included

About This Test

Neisseria gonorrhoeae – Qualitative PCR is a highly sensitive molecular diagnostic test used to detect the presence of Neisseria gonorrhoeae, the bacteria responsible for gonorrhea, a common sexually transmitted infection (STI). This test works by identifying the genetic material (DNA) of the bacteria in clinical samples such as urine or genital swabs. Being a qualitative test, it provides a positive or negative result, indicating whether the infection is present or not, rather than measuring the amount of bacteria. PCR technology allows early and accurate detection, even when symptoms are mild or absent. It is especially useful for screening sexually active individuals and guiding timely treatment, helping prevent complications and further transmission.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable

**Fasting 10–12 hrs essential | *Limited Period Offer | *Reports within 5 days, processing on wednesday, saturday,*
