PHOSPHOLIPID SYNDROME PANEL

Profile Details | 1 Parameters

Fasting: Overnight fasting for 9-12 hours | Report Time: Same Day

Specimen Required: Blood

Price- ~~₹5200~~ **₹2995**

Parameters Included

About This Test

Phospholipid syndrome measures antibodies against phospholipids, which are fats that interact with proteins in the blood, potentially causing blood clotting issues. Ke tests include: - **Anticardiolipin Antibodies (aCL):** Measures antibodies against cardiolipin, a type of phospholipid. - **Lupus Anticoagulant (LA):** Assesses the presence of antibodies that interfere with blood clotting. - **Anti-β2-Glycoprotein I Antibodies (aβ2GPI):** Detects antibodies against β2-glycoprotein I, another phospholipid-binding protein. Elevated levels indicate antiphospholipid syndrome, which can lead to increased risk of thrombosis and pregnancy complications.

98% On-Time Reports	**100% Sample Accuracy**	**Free Home Collection**	**Expert Doctors**	**750+ Lab Tests**
Available 24×7	NABL Certified Labs	Door-to-Door Pickup	Across India	Trusted & Reliable

**Fasting 10–12 hrs essential | *Limited Period Offer | *Reports within Same Day*
