

# PROTEIN S

Profile Details | 1 Parameters

Fasting: Fasting is not mandatory | Report Time: Within 2 Days

**Specimen Required:** Blood

**Price-** ₹5500 **₹2950**

## Parameters Included

### About This Test

A protein S test measures the level and activity of protein S in the blood. Protein S is a cofactor for activated protein C (APC) and plays a crucial role in regulating blood clot formation by inactivating clotting factors Va and VIIIa. Deficiency or dysfunction of protein S can lead to an increased risk of abnormal blood clots (thrombosis). The test is essential for diagnosing inherited or acquired clotting disorders and guiding appropriate anticoagulant therapy.
